CLONE
CUSTOM FIT FOR YOUR FOOT

LAUNCH DATE FEBRUARY 2026

CLONE
THE FUTURE CLASSIC

A lateral X-ray of a human foot and ankle, showing the bones in a light blue/teal color against a dark background. The image captures the tibia and fibula of the lower leg, the talus and calcaneus of the ankle, the tarsal tunnel, the metatarsals, and the phalanges of the toes. The text 'THE FOOT' and a bulleted list are overlaid on the right side of the image.

THE FOOT

- 33 JOINTS
- 26 BONES
- 120 MUSCLES, TENDONS AND LIGAMENTS

PROBLEM

every foot is different

Shoes are expected to fit all feet equally; however, no two feet are shaped the same. And, no matter how well the shoe fits, there will ultimately be friction points.

Made of 33 joints, 26 bones, and 120 muscles, tendons, and ligaments, the foot is an amazing machine that deserves constant innovation. Our vision was to solve this problem by redefining Fit.

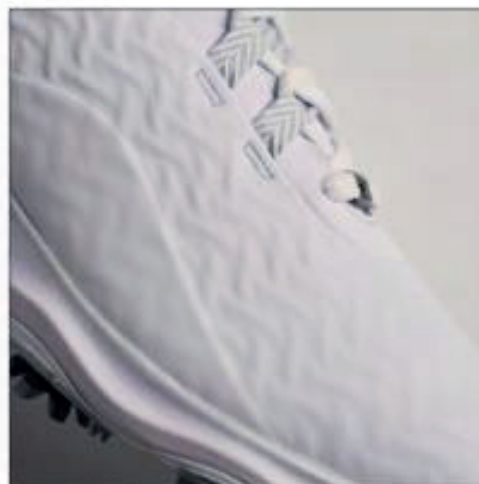

SOLUTION

custom fit for every foot

A material that conforms to different zones of the foot and provides perfect fit unique to each athlete would be unprecedented.

There's a class of materials called 'auxetics' that, when stretched, expand perpendicular to the stretch. We used this principle to develop a tech that moves with the athlete in every direction, always staying identical to the foot's shape.

ADVANTAGE

UA CLONE Technology

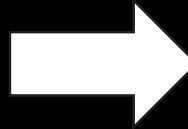

Out of our research on auxetics and our thought leadership in materials and construction, a new footwear innovation was born: UA CLONE Technology, the adaptive upper that gives you identical foot feel and precision fit to make you better. It expands, contracts and performs exactly like you. No friction and no distractions, just the perfect union of you and shoe.

HOW WE MADE IT BETTER - DRIVE PRO CLONE

SS24-FW25 DRIVE PRO

SS26 DRIVE PRO CLONE

- **CLONE UPPER:** PROVIDING CUSTOM FIT FOR EVERY FOOT WITH AUXETIC MICROFIBER UPPER.
- **ENHANCED S3:** IMPROVED S3 STRAP FOR LOCKDOWN LACING FROM LATERAL BALL TO MEDIAL ARCH.
- **ELEVATED BRANDING & TREATMENT:** HIGHLIGHTING S3 & CUSTOM ROTATIONAL RESISTANCE SPIKES.

THE TECH

It molds to your foot's shape to eliminate pressure points and maximize comfort, stability, and support on every swing.

THE PAYOFF

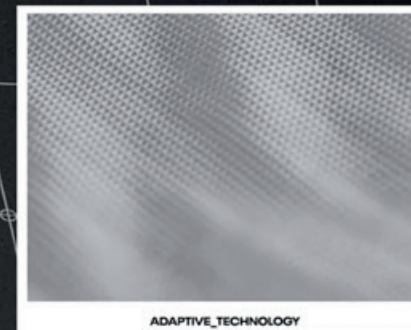

When your footwear is custom fit for you, you're more comfortable, balanced, and dialed-in on every shot.

CLONE SPECS

PROBLEM

- The foot is a very complex mechanism that has been starved of innovation -until now !
- No two feet are the same -so how can a shoe truly fit a foot ?
- Retailers need to stock an array of widths and last types to try to cover consumer needs

SOLUTION

- A CUSTOM FIT for every foot -from a single shoe

UNIQUE

- A shoe that only Under Armour can make
- Auxetic Material Innovation - invented by UA and protected by 35 patents

BENEFIT

- Retailers no longer need to stock additional widths
- Consumer finally gets shoes that fit their feet
- Science -the better a shoe fits -the more connected the foot is to the ground = enhanced performance

PERFORMANCE

- Built on the S3 Platform -the most decorated footwear technology in history
- Bio-mechanically engineered, tested and
